

Welcome *on board*

It gives me great pleasure to welcome you on board this flight today.

Ours has been a long history of innovative flight operations spanning decades. Through time, we have not relented in offering you excellent services as we have not allowed circumstance to deter us; not even the pandemic.

The entire world system, including business and social systems were shut down. The industry of aviation was not left out. This necessitated some level of adjustments in the way businesses were conducted.

While it was expedient to trim operations occasioned by the lockdown rules, I assure you that we are fully back in service and are doing everything within us to meet your travel needs.

We have put plans in place to reinstate all suspended flights in addition to increasing our destinations for a wider reach within the nation. Our technical team members are also working tirelessly to ensure that our aircraft under-going C-checks at the airline's MRO hangers are rolled out within the shortest time possible.

The expansion of operations also includes our Rotary Wing as plans are underway to expand our helicopter fleet for a more robust service in the areas of oil & gas logistics, VIP movement/charter flights, emergency medical evacuations, helicopter maintenance, etc.

As your safety is of paramount importance to us, we have adhered to stipulated safety protocols including sanitizing our aircraft frequently, hand sanitizing, ensuring the wearing of face masks, maintaining social distance, etc. We encourage you to do the same. Remember that the Covid-19 virus is still raging and all hands must be on deck to check the spread especially in the face of the second wave which experts report to be more deadly.

We will continue to work with you and proffer products/services that will enhance your travel experiences at all times.

Once again, I welcome you on board this flight. You remain the focus of our operations. For more information on our offers, please visit us @ www.flyaero.com, or contact us on www.twitter.com/CEOAero, www.twitter.com/flyaero, or www.facebook.com/flyaerocontractors.

You can also call us on 01 448 2542, 0805 090 1119 or 0807 200 5691.

Enjoy your flight.
